# Dental Services For Children And Adults

A healthy smile is a key to preventive health. We provide dental services for children and adults, and have a special interest in promoting oral health education for infants and children. Together we can build a foundation for a healthy smile for children through adulthood. We offer adult dental to Apple Health/Medicaid members, and emergency services to uninsured adults.

PCHS is an accredited federally qualified community health center. Our clinics offer skilled, compassionate, professional services in a modern environment. We are a certified Patient-Centered Medical Home, helping patients maintain and improve their dental, medical, and behavioral health.

PCHS offers sliding fee discounts based on income. For more information, please call our Patient Call Center at 360-377-3776 or visit us at our website at [www.pchsweb.org](http://www.pchsweb.org).
