

Where to Find PCHS Medical Services

With the increasing cost of healthcare, PCHS pharmacies are dedicated to helping our patients access affordable prescriptions through access to the federal government's 340B program (for prescriptions written by a PCHS provider)

Our pharmacy staff are caring and knowledgeable professionals who can answer your questions about:

- Drug safety questions
- Drug/allergy interactions
- Low-cost medication access and 340 Program prescription discounts
- 90-day supplies to lower overall costs

You Medication is Safe

Each prescription processed through PCHS pharmacies gets **a thorough check for drug and disease interactions** to make sure everything is safe for you.

What to Expect with PCHS Pharmacy Services

PCHS pharmacies provide onsite accessibility and the benefit of having close interactions between you pharmacist and your healthcare provider. At PCHS, pharmacists work directly with your care team to make sure your medications are safe and effective.

Pharmacists and your health care providers are here to help you with improving and maintaining your health.

It is important to follow your prescription instructions exactly.

Always confirm your prescription details with your health care provider and your pharmacist. If you have questions, make sure to ask them before you leave.

Do not take medications that do not belong to you. Make sure to store medications securely out of reach of children and pets, for their safety.

Providing services to our communities with our patient-centered approach to care.

Medication Disposal

Each of PCHS' five onsite pharmacies have secure medication drop-off boxes conveniently located for safe disposal of your unused medications. Please ask a PCHS pharmacy provider if you have any questions regarding safe medication disposal.

PCHS' Refill Process

Follow these tips to help make your PCHS medication refill process easier for you:

- Keep track of when you are getting low on your medication
- Call the pharmacy to request your medication refill when you have 3 – 4 days of medication left in your bottle
- Please allow 48 hours to respond to requests or messages
- Insurances often limit refills to be paid only a few days before the next refill is due
- If you need a refill before it is due, please let the pharmacy staff know when you call

PCHS Pharmacists and Providers make sure you feel safe and comfortable in using your prescription. If you are at home and forget prescription instructions, do not hesitate to call, and ask.

PCHS pharmacists can help you with medication adherence issues. They also help our medical providers manage diabetes and anticoagulation for PCHS patients.

Paying for Your Visit

PCHS accepts most medical insurance plans including Apple Health. All patients are eligible to apply for our sliding fee discount, which allows you to pay a reduced fee based on your income. PCHS services are available to patients without regard for ability to pay. This does not mean that services are free, but rather that a payment plan can be created, or other resources may be available to ensure cost is not a barrier to care.
