What Kind of Services do we Provide?

PCHS Dental Clinics have recently increased the types of services provided to patients. We also offer referral services for patients in need of specialized care.

Our Dental Clinics offer patients the following services:

- Preventative care
- Oral examinations
- Periodontal therapy & surgery
- Digital x-rays
- Emergency care
- Teeth cleanings
- Restorative fillings
- Oral surgery (complex cases may be referred to a specialist)
- Root canals (case by case basis)
- Crowns & bridges; partial and full dentures

Dental services are available at the following locations:

3100 Northwest Bucklin Hill Road, Suite 202,
Silverdale, WA 98383

**Sixth Street**
616 6th Street, Bremerton, WA 98337

Specialized Dental Care

PCHS staff will also make every effort to connect you to our network of community specialty providers to get the care you need if your needs fall outside of our services.
What to Expect with PCHS Dental Appointments

**Examination.** Both your dental hygienist and dentist will examine your teeth, gums, and mouth, to look for changes or signs of a problem.

**X-Rays.** At some of your dental visits, your dentist may decide to take X-rays of your teeth to look for any dental problem areas.

**Cleaning and polishing.** Your dental hygienist will remove the tartar and then polish your teeth.

**Education.** After the cleaning, the hygienist or dentist will discuss any dental hygiene areas that need improvement.

That’s about it! **Brushing your teeth 3 times a day and flossing are daily preventative care techniques to help keep your teeth and gums strong and healthy!**

---

**Prohibiting services to our communities with our patient-centered approach to care.**

Did you know that your oral health offers clues about your overall health? Pregnancy causes hormonal changes that put you at increased risk for potential disease. It is important to inform your dental provider if you are or are planning on becoming pregnant.

---

**Taking the First Step**

PCHS would like to see your child when their teeth begin to come in. We emphasize preventative care for children, offering education materials for both the patient and family members. We encourage scheduling regular dental check-ups.

---

**Scheduling the First Appointment**

To schedule your first appointment for yourself or any family member, call us at 360-377-3776.

---

**Your Dental Checkup**

You can help protect your oral health by seeing your dentist regularly for checkups. It’s recommended that most people get a dental checkup every six months, but your dentist may recommend more frequent or fewer visits, depending on your dental health history.

---

**Paying for Your Visit**

PCHS accepts most medical insurance plans including Apple Health. All patients are eligible to apply for our sliding fee discount, which allows you to pay a reduced fee based on your income. PCHS services are available to patients without regard for ability to pay. This does not mean that services are free, but rather that a payment plan can be created or other resources may be available to ensure cost is not a barrier to care.
